

Dear Valued Sweeping Customer,

The North American Power Sweeping Association is proud to announce that **Commercial Power Sweeping** has been awarded the designation of Certified Sweeping Company.

About NAPSA, we are a non-profit organization committed to distributing pertinent sweeping industry information and valuable resources to our members. We are here to provide the street and parking area sweeping industry with an association that will make a difference.

To become a CSC, **Commercial Power Sweeping** had to undergo an application process that qualified them under strict guidelines including: safety, experience, continuing education, vehicle maintenance, driver training and adherence to NAPSA's code of ethics.

The NAPSA Code of Ethics requires **Commercial Power Sweeping** to take an oath to be dedicated to the highest standards of professionalism, integrity and competence while recognizing their responsibility to their customers, employees, and the public.

To learn more about the Certified Sweeping Company designations you can visit our website at www.NAPSAOnline.com. From here you can download an application to see what the requirements are for Certified Sweeping Companies and to view the NAPSA Code of Ethics that **Commercial Power Sweeping** has pledged to uphold. You may also call our office for assistance and questions regarding Certification.

Sincerely,

Amy Allen
Administrative Director
